

MELLOR PRIMARY SCHOOL

Updated Risk Assessment Covid – 22nd February 2021

Overarching Guidance for all staff:

We have revised our risk assessment to be in line with the latest guidance.

In all education, childcare and social care settings, preventing the spread of coronavirus involves dealing with direct transmission (for instance, when in close contact with those sneezing and coughing) and indirect transmission (via touching contaminated surfaces). A range of approaches and actions should be employed to do this. These can be seen as a hierarchy of controls that, when implemented, creates an inherently safer system, where the risk of transmission of infection is substantially reduced.

You must always:

- 1) Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.
- 2) Ensure face coverings are used in recommended circumstances.
- 3) Ensure everyone is advised to clean their hands thoroughly and more often than usual.
- 4) Ensure good respiratory hygiene for everyone by promoting the 'catch it, bin it, kill it' approach.
- 5) Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Consider how to minimise contact across the site and maintain social distancing wherever possible.
- 7) Keep occupied spaces well ventilated.

In specific circumstances:

- 8) Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.
- When undertaking essential intimate care e.g Administering 1st aid or care of children who may have toileting care needs
- If supervising a child who is awaiting collection after showing symptoms of Covid-19
- 9) Promote and engage in asymptomatic testing, where available. Response to any infection

You must always:

- 10) Promote and engage with the NHS Test and Trace process.
- 11) Manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.
- 12) Contain any outbreak by following local health protection team advice.

Key Information for Covid Symptoms

School must ensure that we know the NHS Test & Trace process and how to contact the local Public Health England protections team.

Greater Manchester HPT

Public Health England North West 2nd Floor 3 Piccadilly Place London Road Manchester M1 3BN

Email: Gmanchpu@phe.gov.uk; PHE.gmhpt@nhs.net

Telephone: 0344 225 0562 Out of hours advice: 0151 434 4819 DfE 0800 046 8687

If anyone becomes unwell with a new, continuous cough or a high temperature, loss of taste and smell and exhaustion in school, showing signs of possible COVID-19 they will be sent home and advised to follow the guidance 'COVID-19: guidance for households with possible coronavirus infection guidance'.

As instructed by the DFE, all members of the school community should be ready and willing to <u>book</u> a test if they are displaying symptoms. See also NHS guidance or dial 119.

Staff Principles

- 1. Do not come to work if you have coronavirus symptoms or go home as soon as these develop (informing your school leadership team) and access a test as soon as possible.
- 2. Clean your hands and wrists more often than usual with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
- 3. Use the 'catch it, bin it, kill it' approach, and place tissues in the lidded bins.
- 4. Avoid touching your mouth, nose and eyes.
- 5. Clean frequently touched surfaces often, using standard products.
- 6. Think about ways to modify your interaction to keep a distance from children in your class as much as possible, particularly close face to face support (noting that it's understood that this is not possible at all times, which is why hygiene and hand cleaning is so important).
- 7. Consider avoiding calling pupils to the front of the class or going to their desk to check on their work if not necessary, work over the shoulder or to the side (more relevant with older age children) but we all must be aware of reducing risk.
- 8. Help your class to follow the rules on hand cleaning, not touching their faces, 'catch it, bin it, kill it' etc. <u>including by updating your classrooms</u> displays with posters.
- 9. Limit your class from sharing equipment and resources.
- 10. Keep your classroom door and windows open if possible, for air flow a minimum of doors/windows open during breaktimes/lunchtimes.
- 11. Ensure that ventilation is evident in the staffroom take necessary action if the windows haven't been opened.
- 12. Limit the number of children from your bubble using the toilet at any one time, and remind the children of personal hygiene.
- 13. **Limit your contact with other staff members**, and don't congregate in shared spaces, especially if they are in small rooms. Max of 6 staff in the staffroom at any one time. Use other staff areas library and hall.
- 14. Keep the integrity of your bubble and don't work in other areas unless you have specific need or have been directed to.
- 15. Re-familiarise yourself with the school's behaviour policy and know what role in it you're being asked to take.
- 16. Staff to work from home if instructed, dependent on their role.

17. Wear face coverings in communal areas such as corridors and staff areas. Face coverings and shields can be worn in the classroom. Information relevant to school regarding face coverings to be read. (See next page)

What a face covering is.

In the context of the coronavirus (COVID-19) outbreak, a face covering is something which safely covers the nose and mouth. You can buy reusable or single-use face coverings. You may also use a scarf, bandana, religious garment or hand-made cloth covering, but these must securely fit round the side of the face.

Face coverings are not classified as <u>PPE (personal protective equipment)</u> which is used in a limited number of settings to protect wearers against hazards and risks, such as surgical masks or respirators used in medical and industrial settings.

Face coverings are instead largely intended to protect others, not the wearer, against the spread of infection because they cover the nose and mouth, which are the main confirmed sources of transmission of virus that causes coronavirus infection (COVID-19).

If you wish to find out more about the differences between surgical face masks, PPE face masks, and face coverings see the MHRA's (Medicines and Healthcare products Regulatory Agency) <u>regulatory status of equipment being used to help prevent coronavirus (COVID-19)</u>.

Face coverings are now compulsory across the UK when:

- Travelling on public transport
- In shops, supermarkets and shopping centres
- Not seated at a table to eat or drink in hospitality venues (when open according to the tier system and outside of lockdown)

People can be refused travel for not following the rules or fined as a last resort. The police can issue a £200 fine to someone breaking the face covering rules. Repeat offenders face bigger fines.

In England, face coverings are also compulsory in a number of indoor spaces, including:

Banks, building societies and post offices

- Places of worship
- Museums, galleries and entertainment venues
- Libraries and public reading rooms

Face visors or shields

A face visor or shield may be worn in addition to a face covering, but not instead of one. This is because face visors or shields do not adequately cover the nose and mouth.

When you do not need to wear a face covering

In settings where face coverings are required in England there are some circumstances where people may not be able to wear a face covering. Please be mindful and respectful of such circumstances. Some people are less able to wear face coverings, and the reasons for this may not be visible to others.

This includes (but is not limited to):

- children under the age of 11 (Public Health England does not recommend face coverings for children under the age of 3 for health and safety reasons)
- people who cannot put on, wear or remove a face covering because of a physical or mental illness or impairment, or disability
- where putting on, wearing or removing a face covering will cause you severe distress
- if you are speaking to or providing assistance to someone who relies on lip reading, clear sound or facial expressions to communicate
- to avoid harm or injury, or the risk of harm or injury, to yourself or others including if it would negatively impact on your ability to exercise or participate in a strenuous activity
- police officers and other emergency workers, given that this may interfere with their ability to serve the public

There are also scenarios when you are permitted to remove a face covering:

- if required in order to receive treatment or services
- in order to take medication
- if you are undertaking exercise or an activity and it would negatively impact your ability to do so
- if you are an elite sports person, professional dancer or referee acting in the course of your employment

The government's <u>guidance</u> for <u>keeping</u> workers and <u>customers</u> safe during <u>COVID-19</u> in <u>restaurants</u>, <u>pubs</u>, <u>bars</u> and <u>takeaway</u> <u>services</u> clearly advises that designated indoor seating areas for customers to eat or drink should at this time only be open for table service, where possible, alongside additional infection control measures. (When open according to the tier system and outside of lockdown)

Exemption cards

If you have an age, health or disability reason for not wearing a face covering:

- you do not routinely need to show any written evidence of this
- you do not need show an exemption card

This means that you do not need to seek advice or request a letter from a medical professional about your reason for not wearing a face covering. However, some people may feel more comfortable showing something that says they do not have to wear a face covering. This could be in the form of an exemption card, badge or even a home-made sign.

Carrying an exemption card or badge is a personal choice and is not required by law.

If you wish to use an exemption card or badge, you can <u>download exemption card templates</u>. You can then print these yourself or show them on a mobile device. Please note that the government is not able to provide physical exemption cards or badges.

If you use assistive technology (such as a screen reader) and need a version of these templates in a more accessible format, please email publiccorrespondence@cabinetoffice.gov.uk. Please say what format you need the template in and what assistive technology you use. For exemptions in different parts of the UK please refer to the specific guidance for Northern Ireland, Scotland and Wales.

(COVID-19), including staying safe outside your home. If you have recent onset of any of the most important symptoms of coronavirus (COVID-19):

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of smell or taste (anosmia)

you and your household must isolate at home: wearing a face covering does not change this. You should <u>arrange to have a test to see if you have</u> COVID-19.

How to wear a face covering

A face covering should:

- cover your nose and mouth while allowing you to breathe comfortably
- fit comfortably but securely against the side of the face
- be secured to the head with ties or ear loops
- be made of a material that you find to be comfortable and breathable, such as cotton
- ideally include at least 2 layers of fabric (the World Health Organization recommends 3, depending on the fabric used)

• unless disposable, it should be able to be washed with other items of laundry according to fabric washing instructions and dried without causing the face covering to be damaged

When wearing a face covering you should:

- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before putting a face covering on
- avoid wearing on your neck or forehead
- avoid touching the part of the face covering in contact with your mouth and nose, as it could be contaminated with the virus
- change the face covering if it becomes damp or if you've touched it
- avoid taking it off and putting it back on a lot in quick succession (for example, when leaving and entering shops on a high street)

When removing a face covering:

- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before removing
- only handle the straps, ties or clips
- do not give it to someone else to use
- if single-use, dispose of it carefully in a residual waste bin and do not recycle
- if reusable, wash it in line with manufacturer's instructions at the highest temperature appropriate for the fabric
- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser once removed

Staying COVID Secure – Our Commitment

- ✓ We recognise the risk posed by Coronavirus (COVID-19) to our staff, pupils and their families. Control measures to minimise the risk of infection and the transmission of the virus are provided in this Risk Assessment.
- ✓ We will ensure, as far as is reasonably practicable, the Health, Safety and Wellbeing of our staff and pupils.
- ✓ We will share this Risk Assessment and its findings with our staff and consult on its contents.
- ✓ We will continue to comply with all relevant Health and Safety Legislation.

Supporting Staff and Children

- ✓ We value our staff and children highly.
- School has a range of systems for supporting both children and staff well-being. Please approach Mr Nicholson or Ms Parkin in confidence should you feel there is a need for further help.
- The DfE has also provided extra support. Parents and staff can contact www.gov.uk/government/news/extra-mental-health-support-for-pupils-and-teachers

The Education Support Partnership (www.educationsupport.org.uk) provides a free helpline for school staff.

identified as clinically extremely vulnerable should follow the published guidance. Staff should talk to their employers about how they will be supported, including to work from home. Schools should continue to pay clinically extremely vulnerable staff on their usual terms.

Those living with someone who is clinically extremely vulnerable can still attend work where home-working is not possible. Staff who are clinically vulnerable Clinically vulnerable staff can continue to attend school where it is not possible to work from home. While in school they should follow the sector-specific measures in this document to minimise the risks of transmission. This includes taking particular care to observe good hand and respiratory hygiene, minimising contact and maintaining social distancing in line with the provisions set out in the 'prevention' section of this guidance. This provides that ideally, adults should maintain 2 metre distance from others, and where this is not possible avoid close face to face contact and minimise time spent within 1 metre of others. While the risk of transmission between young children and adults is likely to be low, adults should continue to take care to socially distance themselves from other adults including older children and adolescents. People who live with those who are clinically vulnerable or clinically extremely vulnerable can attend the workplace but should ensure they maintain good prevention practice in the workplace and home settings.

Staff not engaged with virtual conferencing could miss latest advice/guidance

7.30am and 6.00 pm unless covering OOSC and accept caretaker. Staff who are pregnant As per national restrictions, staff should work at home where possible. If home working is not possible, pregnant staff and their employers should follow the advice in the Coronavirus (COVID-19): advice for pregnant employers, should follow the advice, which applies to all staff in schools. All pregnant women are in the 'clinically vulnerable' category and are generally advised to follow the above advice, which applies to all staff in schools. All pregnant women should take particular care to practise frequent thorough hand washing, and cleaning of frequently touched areas in their home or workspace, and follow the measures set out in the system of controls section of this guidance to minimise the risks of transmission. Pregnant women are not advised to be vaccinated against COVID-19. An employer's workplace risk assessment should already consider any risks to new and expectant mothers (for example, from working conditions, or the use of physical, chemical or biological agents). Any risks identified must be included and	13	Staff should only enter the school site between

within the last 6 months, the employer should			within the last 6 months, the employer should	

check the workplace risk assessment to see if any new risks have arisen. If risks are identified during the pregnancy, in the first 6 months after birth, or while the employee is still breastfeeding, the employer must take appropriate sensible action to reduce, remove or control them. While it is a legal obligation for employers to regularly review general workplace risks, there is not necessarily a requirement to conduct a specific, separate risk assessment for new and expectant mothers. However, an assessment may help identify any additional action that needs to be taken to mitigate risks. Employers should be aware that pregnant women from 28 weeks' gestation, or with underlying health conditions at any gestation, may be at greater risk of severe illness from coronavirus (COVID-19). This is because, although pregnant women of any gestation are at no more risk of contracting the virus than any other nonpregnant person who is in similar health, for those women who are 28 weeks pregnant and beyond there is an increased risk of becoming severely ill, and of pre-term birth, should they contract coronavirus (COVID-19). This is also the case for pregnant women with underlying health conditions that place them at greater risk of severe illness from coronavirus (COVID-19). We recommend that schools follow the same principles for pregnant pupils, in line with their wider health and safety obligations. Read more guidance and advice on coronavirus (COVID-19) and pregnancy from the Royal College of Gynaecologists.

Talk to staff about the plans (for example, safety measures, timetable changes and staggered arrival and departure times), including discussing whether training would be helpful.	
 Keep 'bubbles' together where possible and: ensure that children and young people are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days ensure that the same teacher(s) and other staff are assigned to each group and, as far as possible; these stay the same during the day and on subsequent days, including OOSC. 	

Our Pupils

Ref	Control Measure	DfE guidance	Risks

15	Clinically Extremely Vulnerable pupils should not attend school during the current national lockdown	Pupils who are shielding or self-isolating - Education settings As our knowledge of COVID-19 has grown, we now know that very few children and young people are at highest risk of severe illness due to the virus. Doctors have therefore been reviewing all children and young people who were initially identified as clinically extremely vulnerable to confirm whether they are still thought to be at highest risk.	Families not truthful about household health Staff mixing with different 'bubbles' and cross contamination Lack of space Difficulty of social distancing young children
16	All pupils or persons within their household that have COVID 19 symptoms should not attend school/ setting.	If you have already discussed this with your child's doctors and they have confirmed your child is still considered clinically extremely vulnerable, your child should follow this shielding advice.	
17	We will provide on-line/distance learning for all pupils who are not in school if the relevant class teacher is available to do so and inline with Providing remote education information to parents/carers	Under the current national lockdown, children will learn remotely until February half term, except for vulnerable children and the children of critical workers who may still attend school.	
18	Only children who are symptom free or have completed the required isolation period attend school.	Clinically extremely vulnerable children and young people should not attend school or other educational settings,	Children being vectors of transmission and staff not maintaining their own control mechanisms to reduce close contact.
19	All pupils in school are required to be in a relevant 'bubble'. These 'bubbles' are groups to limit unnecessary contact. Class 'bubbles' will be the main structure during the school day, then OOSC 'bubbles' if possible. Desks to be front facing spaced as far apart as possible for Years 5 & 6.	because the risk of exposure to the virus in the community is now very high. Your school or college will make appropriate arrangements for you to be able to continue your education at home. You should note however that:

not be penalised.	
Pupils and families who are anxious about	
<u>return to school</u>	
All other pupils must attend school.	
Schools should bear in mind the potential	
concerns of pupils, parents and	
households who may be reluctant or	
anxious about returning and put the right	
support in place to address this. This may	
include pupils who have themselves been	
shielding previously but have been advised	
that this is no longer necessary, those	
living in households where someone is	
clinically vulnerable, or those concerned	
about the comparatively increased risk	
from coronavirus (COVID-19), including	
those from Black, Asian and Minority	
Ethnic (BAME) backgrounds or who have	
certain conditions such as obesity and	
diabetes.	
If parents of pupils with significant risk	
factors are concerned, we recommend	
schools discuss their concerns and provide	
reassurance of the measures they are	
putting in place to reduce the risk in	
school. Schools should be clear with	
parents that pupils of compulsory school	
age must be in school unless a statutory	
reason applies (for example, the pupil has	
been granted a leave of absence, is unable	
to attend because of sickness, is absent for	
a necessary religious observance etc.).	
In light of the need for children to behave	
differently when they return to school,	

and any new systems you have put in place to support that, you'll need to make changes to your behaviour policy.

Behaviour policy changes will also need to be communicated to pupils, parents and staff.

School has added:

- altered routines for arrival or departure
- instructions on hygiene, such as handwashing and sanitising
- instructions on who pupils can socialise with at school
- moving around the school as per specific instructions (for example, one-way systems, out of bounds areas, queuing)
- expectations about sneezing, coughing, tissues and disposal ('catch it, bin it, kill it') and avoiding touching your mouth, nose and eyes with hands
- tell an adult if you are experiencing symptoms of coronavirus
- rules about sharing any equipment or other items including drinking bottles
- amended expectations about breaks or play times, including where children may or may not play
- use of toilets
- clear rules about coughing or spitting at or towards any other person
- clear rules for pupils at home about conduct in relation to remote education
- rewards and sanction system where appropriate

	Identify any reasonable adjustments that need to be made for students with more	
	challenging behaviour.

	•	self-isolate for 10 days from the day after the individual	
		tested positive. If a child is awaiting collection, they should	
		be moved, if possible, to a room where they can be	
		isolated behind a closed door, depending on the age and	
		needs of the child, with appropriate adult supervision if	
		required. Ideally, a window should be opened for	
		ventilation. If it is not possible to isolate them, move them	

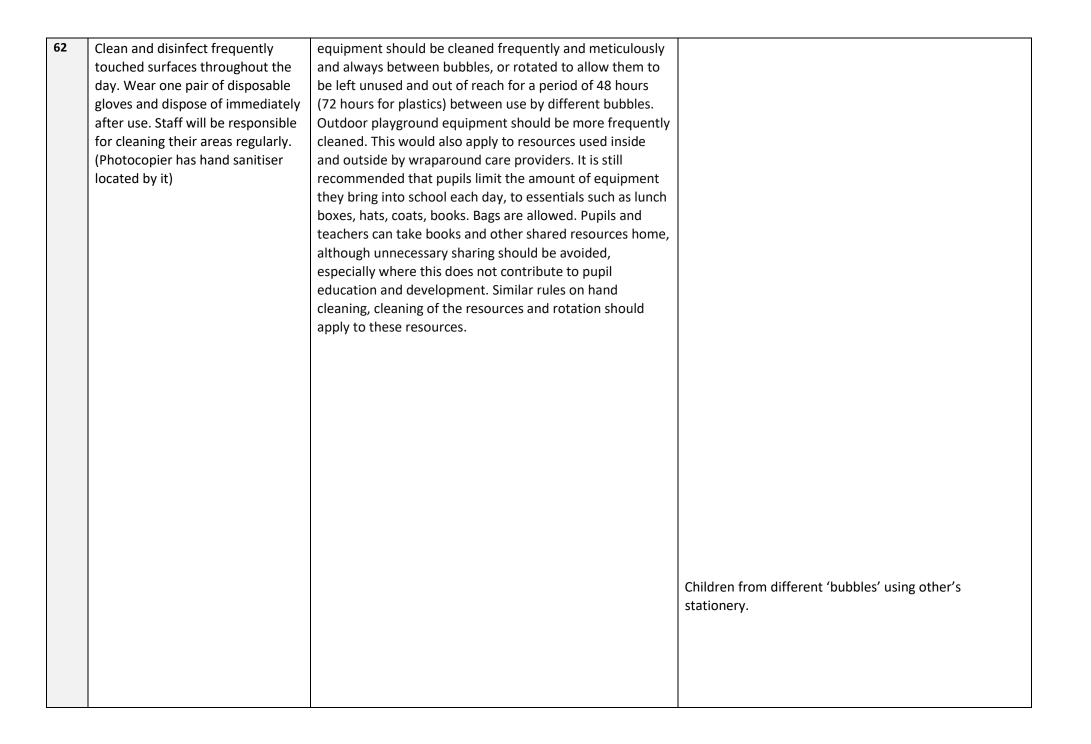

to an area which is at least 2 metres away from other people. If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom must be cleaned and disinfected using standard cleaning products before being used by anyone else. PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs). More information on PPE use can be found in the safe working in education, childcare and children's social care settings, including the use of personal protective equipment (PPE) guidance.

As is usual practice, in an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms should not otherwise visit the GP, pharmacy, urgent care centre or a hospital.

Any member of staff who has provided close contact care to someone with symptoms, even while wearing PPE, and all other members of staff or pupils who have been in close contact with that person with symptoms, even if wearing a face covering, do not need to go home to self-isolate unless:

- the symptomatic person subsequently tests positive
- they develop symptoms themselves (in which case, they should arrange to have a test)
- they are requested to do so by NHS Test and Trace or the PHE advice service (or PHE local health protection team if escalated) Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned after they have left to reduce the risk of passing the infection on to other people. See the COVID-19: cleaning of non-healthcare settings guidance.
